SUMMARY

Senior Unity Developer with 11 years of experience building multiplayer, mobile, WebGL, and PC games using Unity and C#. Specialized in real-time multiplayer systems, client-server architecture, gameplay programming, performance optimization, and scalable live-service infrastructure.

Experienced leading technical teams, mentoring developers, and collaborating with cross-functional departments to deliver high-quality products from conception to release. Strong expertise in multiplayer networking technologies including Photon Fusion, Netcode for GameObjects, and dedicated server architectures.

Skilled in designing maintainable systems, optimizing production pipelines, and developing scalable gameplay features across mobile, desktop, and browser platforms.

CORE EXPERTISE

- Real-time Multiplayer Architecture
- Server-Authoritative Networking
- Gameplay Systems Programming
- Unity Performance Optimization
- Mobile & WebGL Development
- Dedicated Server Infrastructure
- Matchmaking & Session Management
- Live-Service Game Development
- Technical Leadership & Mentorship
- Cross-Platform Deployment

SELECTED PROJECTS

Max Slam – Real-Time Multiplayer iGaming

Senior Unity Developer – MaxDuel (Betsoft Gaming)

- Developed scalable multiplayer gameplay systems using Unity and C#.
- Implemented server-authoritative multiplayer architecture, matchmaking, and session management systems.
- Collaborated with designers, QA, and backend teams to deliver stable live-service gameplay features.
- Optimized gameplay performance across mobile and WebGL platforms.
- Contributed to long-term technical planning and scalable system architecture.

Technologies:

Unity, C#, Multiplayer Architecture, WebGL, Netcode for GameObjects, Unity Services, Javascript, REST APIs, WebGL

[Platform](#)

Lost Twins 2 – Puzzle Platformer (Multi-Platform)

Senior Unity Developer – WRP Studios (erstwhile weRplay)

- Designed and implemented the core time-manipulation puzzle system for the game.
- Built character locomotion states including rope, water traversal, and vehicle mechanics.
- Developed physics-driven interactions — rope physics, water buoyancy, and car dynamics.
- Reported directly to the CTO, owning technical decisions across all gameplay systems.
- Shipped across Steam, PS5, Xbox Series X|S, Nintendo Switch, iOS, and Android.

Technologies:

Unity, C#, Physics Systems, Animation, Cross-Platform Development, Console

21 Duel – Multiplayer Card Game

Senior Unity Developer – MaxDuel (Betsoft Gaming)

- Designed and implemented multiplayer gameplay systems for competitive card-based gameplay.
- Developed networking logic and gameplay synchronization systems.
- Worked closely with backend systems and live-service functionality.
- Optimized gameplay responsiveness and multiplayer stability.

Technologies:

Unity, C#, Multiplayer Systems, Client-Server Architecture

Explottens – Apple Arcade

Senior Unity Developer – WRP Studios (erstwhile weRplay)

- Principal developer responsible for making Explottens in Unity.
- Built gameplay systems and core mechanics while maintaining production quality standards.
- Collaborated with artists and designers to implement polished gameplay experiences.
- Followed clean architecture principles and scalable programming patterns.

Technologies:

Unity, C#, Mobile Development, Gameplay Systems

WORK EXPERIENCE

MaxDuel (Betsoft Gaming)

Senior Unity Developer • December, 2024 - November, 2025

Responsibilities:

- Developed scalable multiplayer gameplay systems using Unity and C#.
- Implemented server-authoritative multiplayer architecture, matchmaking, and session management systems.
- Collaborated with designers, QA, and backend teams to deliver stable live-service gameplay features.
- Optimized gameplay performance across mobile and WebGL platforms.
- Conducted code reviews and mentored developers to maintain engineering standards.
- Contributed to long-term technical planning and scalable system architecture.

Big Immersive

Senior Unity Developer • August, 2023 - July, 2024

Nitro League:

- Coordinated with backend, QA, marketing, and design teams to implement gameplay features.
- Managed sprint execution and technical backlog using Jira.
- Improved technical workflows and project maintainability.

Virtua & Maians:

- Designed foundational architecture for multiplayer metaverse systems.
- Implemented state synchronization using Photon Fusion 2.
- Optimized WebGL builds for improved browser performance.
- Integrated backend APIs for real-time functionality and communication.

WRP Studios (erstwhile weRplay)

Senior Unity Developer • April, 2021 - July, 2023

- Worked as a Senior Game Developer and Team Lead across multiple Unity projects.
- Ensured adherence to clean architecture principles, coding standards, and game programming best practices.
- Collaborated with artists, designers, and QA teams to deliver polished gameplay experiences.
- Principal developer responsible for making Explottens, an Apple Arcade title, using Unity.
- Served as Senior Unity Developer on Lost Twins 2, a multi-platform puzzle platformer shipped on Steam, PS5, Xbox Series X|S, Switch, iOS, and Android, reporting directly to the CTO.
- Developed gameplay systems and implemented production-ready features for Spy Ninja Network.
- Oversaw technical quality, gameplay implementation, debugging, and testing workflows.

AptechMedia

Senior Unity Developer • Mar, 2016–Mar, 2021

- Led development of multiple Unity game projects for Android and iOS platforms.
- Designed and implemented multiplayer architecture for Poker King, a turn-based multiplayer poker game using Photon networking.
- Served as lead developer for Deer Hunt, an FPS hunting game for mobile platforms.
- Developed gameplay systems, UI systems, and platform-specific optimizations.
- Collaborated with artists, designers, and QA teams to build and maintain production-ready features.
- Conducted debugging, testing, and release support throughout development lifecycles.
- Maintained code quality standards and contributed to scalable gameplay architecture.

Skippy Apps

Unity Developer • Mar, 2015–Feb, 2016

- Developed gameplay features and game systems using Unity and C#.
- Assisted in implementing UI systems, gameplay mechanics, and mobile platform features.
- Participated in debugging, testing, and optimization workflows.
- Collaborated with team members to deliver stable mobile game experiences.

EDUCATION

Bachelors of Science in Electrical Engineering	FAST National University of Computer and Emerging Sciences (Islamabad, Pakistan)	2013
--	---	------

TECHNICAL SKILLS

Game Development

- Unity 3D
- C#
- Multiplayer Architecture
- Photon Fusion
- Photon PUN2
- Netcode for GameObjects
- Mirror Networking
- Matchmaking Systems
- Dedicated Servers
- Object Pooling
- Gameplay Systems
- WebGL Development
- Mobile Game Development

LEADERSHIP & COLLABORATION

- Technical Leadership
- Team Mentorship
- Agile/Scrum Collaboration
- Cross-Functional Communication
- Problem Solving
- System Design
- Production Planning
- Code Review & Engineering Standards

DevOps & Infrastructure

- CI/CD Pipelines
- GitHub Actions
- Unity Cloud Build
- Linux Server Hosting
- Load Testing
- Multiplayer Deployment

Programming Languages

- C#
- C++
- TypeScript
- Python
- Dart
- JavaScript

Backend & Cloud

- Node.js
- REST APIs
- WebSockets
- Firebase
- PlayFab
- AWS (EC2, S3, CloudFront)
- DigitalOcean
